GENRE LESSONS

Each of the five main writing genres is divided into several text type units. The resources in each unit are provided at four developmental levels of writing: beginning (L1), early developing (L2), developing (L3) and fluent (L4).

These levels directly correspond to the skills and abilities at grades one, two, three, and four through six. Every unit includes: a multi-level lesson plan,

leveled samples, leveled graphic organizers, leveled graphic organizer samples, leveled revision checklists, leveled editing guides, leveled classroom posters, and a multi-level rubric.

I downloaded these and reorganized them according to genre so everything is together.
